

Commercial decorating

Paintivo / Manchester and surrounding areas

Working in occupied buildings

Wall and ceiling decoration, feature walls, joinery and planned refreshes for offices, retail units, hospitality venues, schools, healthcare settings and managed property. The survey establishes which rooms can be released, the preparation required and the finishes suited to the way the building is used.

What to include in a project brief

Send the site address, floor plans or photographs, the areas in scope and any fixed opening or handover dates. Identify sensitive equipment, delivery routes, rooms that need to remain in service and your site contact for access or permits.

From survey to handover

Agree the room schedule and surface preparation in the written quotation. Record product and colour selections by room, confirm the sequence with the person responsible for the building and inspect completed areas before furniture and signage return.
